Game created by students of
Lycée Classique d'Echternach (Luxembourg),
Gymnasium Carolinum de Neustrelitz (Allemagne),
Collège Notre-Dame de Bonne-Espérance d'Estinnes (Belgique).

Monopole de l'oie

In Belgium, we notice the closure of many companies, which increases the unemployment rate in our regions. During this game, you will be real investors. You will be brought to buy companies to commit workers' largest number and thus raise the Belgian economy. You will receive a budget, to you to manage him in a the most strategic possible way !

- **«ENTERPRISE» CARDS (ANNEX 6)**

- **1 TABLE OF SYMBOLS (ANNEX 7)**

Goal of the game

Each player has to go to the last square (square 50) at the end of the second time around the board having bought the the most businesses and having the most workers.

Game process

- Each player starts with :

If 3 players	10.000€
If 4 players	7.500 €
If 5 players	6.000 €

- The younger player starts.

- The player must throw the dice to move forward. He moves the amount of times indicated by the number on the dice.

Special squares :

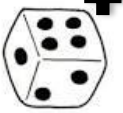

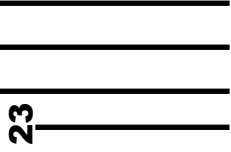

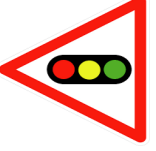

- Square 4 = « Dice + » : the player must throw the dice again and move forward the amount of times indicated by the dice.
- Squares 8 ;16 ;28 and 43 = « Well » : When the player lands here he must go back to square 1.
- Square 14 = « Red stop» : The player must skip a turn before throwing the dice.
- Squares 18 and 30 = « Switch » : When the player lands here he can move to the next square of the same colour (red or green).
- Square 23 = « Prison » : The player stays stuck here until he gets a 6 with the dice. The player can only roll the dice once a turn !
- Square 38 = « Dice - » : the player must throw the dice again and move back the amount of times indicated by the dice.
- Squares 40 and 47 = « Ladder » : If the player is on square 40, he can go straight to square 47. If the player lands on square 47, he must go back to square 40.
- « Business » squares : Each business has a certain number of workers. The price of the business varies according to the number of workers.
- « Lucky » squares (?) : The player takes the first card from the stack and sees what he has won. Some of the cards can be used later on in the game (if so, it will be written on it)

End of the game

- The first player to get to the last square at the end of the second time around the board wins a bonus consisting of one business with 200 workers.
- At the end of the game, each player can buy workers with the amount of money he still possesses.

1	worker :	15€
5	workers :	65€
10	workers :	120€

1	2	3	4	5	6	7	8	9	10

Symbols	Significations
	The player draws the first card from the pile when he hits the lucky box, and looks at what he has won. Some can be used later in the game (if so, it's shown on the map).
	When the player falls on this box, he returns to box 1.
	The player waits for a turn before he can roll the die again.
	The player who falls on one of these boxes can advance to the next box of the same color as the sign.
	The player who falls on one of these boxes can advance to the next box of the same color as the sign.
	The player stays stuck until he makes a 6 with the die, or if he has a chance card that allows him to go out immediately. He can only roll the die once per turn !
	If the player is on box 40, he can go directly to box 47. If the player arrives on box 47, he must return to box 40 by the ladder.
	The player must roll the die, and move (+) or back (-) the value indicated on the die.
	The price that costs the company. The amount is on the company card.
	The price that costs the company. The amount is on the company card.
	The number of workers per company. The number is on the company card.
